

GENERAL INFORMATION

REGISTRATION

Course tuition includes course materials (including a copy of the pertinent regulations), coffee breaks, and course credits. Payment IN FULL must be received prior to the start of the course. All courses will be held in Helena, MT.

4 Easy Ways to Register

TELEPHONE (801-581-4055) your registration, followed by payment or purchase order within two weeks.

ONLINE registration (<https://umarket.utah.edu/um2/rmcoeh>) is available; payment must follow within two weeks.

FAX (801-585-5275) your completed registration form, followed by payment or purchase order within two weeks.

MAIL completed registration form with check or company purchase order to the address on the registration form. You are considered registered when full payment or a purchase order has been received. If you expect payment delays, send completed registration form now and your payment within two weeks.

Disability accommodations require advance notice at time of registration or you may contact the Program Coordinator at (801) 581-4055 prior to the course.

Registrations should not be considered confirmed until a written confirmation letter is received by the course participant. Confirmation letters are mailed within 5 working days of receipt of registration form.

If you have further questions or need assistance, please contact Registration Coordinator, RMCOEH, 391 Chipeta Way, Suite C, University of Utah, Salt Lake City, Utah 84108, 801-581-4055 (Fax: 801-585-5275).

CREDITS

All courses will be awarded Continuing Education Units (CEUs), the national standard for recognition of non-university professional education. ABIH CM points have been requested.

CANCELLATION/SUBSTITUTION POLICY

If you are unable to attend, a substitution can be made at any time without charge. Refunds, less a \$50 administrative fee, can be issued on request for all cancellations except those postmarked or faxed within 10 business days of the course, for which no refunds or credit will be given. The University reserves the right to cancel programs if necessary. In this event, the University's liability is limited to the full refund of your registration fee.

OSHA 511: Occupational Safety and Health Standards for General Industry
January 9-12, 2017

This course covers OSHA Standards, policies, and procedures in general industry. Topics include scope and application of the OSHA General Industry Standards, general industry principles and special emphasis on those areas in general industry which are most hazardous. Upon course completion students will have the ability to define general industry terms found in the OSHA General Industry Standards, identify hazards which occur in general industry, locate and determine appropriate OSHA General Industry Standards, policies, and procedures, and describe the use of OSHA General Industry Standards and regulations to supplement an ongoing safety and health program.

Cost: \$695

OSHA 510: Occupational Safety and Health Standards for the Construction Industry
February 6-9, 2017

This course covers OSHA Standards, policies, and procedures in the construction industry. Topics include scope and application of the OSHA Construction Standards, construction safety and health principles, and special emphasis on those areas in construction which are most hazardous. Upon course completion students will have the ability to define construction terms found in the OSHA Construction Standards, identify hazards which occur in the construction industry, locate and determine appropriate OSHA Construction Standards, policies, and procedures, and describe the use of the OSHA Construction Standards and regulations to supplement an ongoing safety and health program.

Cost: \$695

OSHA 501: Trainer Course in Occupational Safety and Health Standards for General Industry
March 6-9, 2017

This course is designed for individuals interested in teaching the 10 and 30-hour general industry safety and health Outreach training program to their employees and other interested groups. Using the OSHA General Industry Standards as a guide, special emphasis is placed on those topics required in the 10- and 30-hour programs as well as those which are most hazardous. Students are briefed on effective instructional approaches and use of

visual aids and handouts. This course allows the student to become a trainer in the OSHA Outreach Training Program, to conduct both 10- and 30-hour General Industry Outreach classes, and to issue cards to participants after verifying course completion. **Students who wish to participate as authorized trainers in the OSHA Outreach Training Program must prepare a presentation on an assigned OSHA General Industry Outreach Training Program topic individually or as part of a group and successfully pass a written exam at the end of the course. Please bring a flash drive or laptop, if possible for your presentation.**

Prerequisites: Students must successfully complete the OSHA #511 Occupational Safety and Health Standards for General Industry and have five (5) years of safety and health work experience in general industry. A degree in occupational safety and health, a Certified Safety Professional (CSP) or a Certified Industrial Hygienist (CIH) designation may be substituted for two (2) years of work related experience. Students should obtain guidance on whether they meet this requirement from the OSHA Training Institute Education Center where they intend to receive the training. Authorized OSHA General Industry Outreach Training Program trainers are required to attend SHA #503 Update for General Industry Outreach Trainers at least once every four (4) years to maintain their trainer status.

Cost: \$715

OSHA 5810: Hazards Recognition and Standards for On-Shore Oil and Gas Exploration and Production
April 3-6, 2017

This course covers OSHA Construction and General Industry Standards relating to the oil and gas industry. This course provides information for employees and employers to protect themselves by developing the knowledge and skills to anticipate, recognize, evaluate and control hazards common to the on-shore oil and gas exploration and production industry. This includes work sites associated with the on-shore exploration and production oil and gas industry including, but not limited to construction, drilling, completion, well servicing, production, product gathering and processing, and product transmission. This course is intended for employees and employers engaged in all phases of on-shore oil and gas exploration and production. Upon course completion students will be able to determine hazards associated with the oil and gas industry, control and hazard abatement, and use of the OSHA standards, policies, and procedures as they relate to the gas and oil industry.

Cost: \$650

OSHA 500: Trainer Course in Occupational Safety and Health Standards for the Construction Industry
April 17-20, 2017

This course is designed for individuals interested in teaching the 10- and 30-hour construction safety and health Outreach Training Program to their employees and other interested groups. Using OSHA Construction Standards as a guide, special emphasis is placed on those topics required in the 10- and 30-hour programs as well as those which are most hazardous. Students are briefed on effective instructional approaches and use of visual aids and handouts. This course allows the student to become a trainer in the OSHA Outreach Training Program, to conduct both 10- and 30-hour Construction Outreach classes, and to issue cards to participants after verifying course completion. **Students who wish to participate as authorized Outreach trainers in the OSHA Outreach Training Program must prepare a presentation on an assigned OSHA Construction Outreach Training Program topic individually or as part of a group and successfully pass a written exam at the end of the course. Please bring a flash drive or laptop, if possible for your presentation.**

Prerequisites: Students must successfully complete the OSHA #510 Occupational Safety and Health Standards for Construction and have five (5) years of safety and health work experience in the construction industry. A degree in occupational safety and health, a Certified Safety Professional (CSP) or a Certified Industrial Hygienist (CIH) designation may be substituted for two (2) years of work related experience. Students should obtain guidance on whether they meet this requirement from the OSHA Training Institute Education Center where they intend to receive the training. Authorized OSHA Outreach Training Program trainers are required to attend OSHA #502 Update for every four (4) years to maintain their trainer status.

To determine if you meet these eligibility requirements, please visit <http://medicine.utah.edu/mountain-west-osha/index.pho>. Look for Verification Form and download the document.

Cost: \$715

OSHA 2225: Respiratory Protection
June 5-8, 2017

This course covers the requirements for the establishment, maintenance, and monitoring of a respiratory protection program. Course topics include terminology, OSHA Respiratory Protection Standards, NIOSH certification, respiratory protection programs, and medical evaluation requirements. Program highlights include workshops on respirator selection, qualitative and quantitative fit testing, and the use of respiratory protection and support equipment. Upon course completion students

will have the ability to identify and describe the elements of a respiratory protection program, the proper selection, use, and inspection of respiratory protection, protection factors, and evaluate compliance with OSHA Standards.

Cost: \$650

OSHA 2264: Permit-Required Confined Space Entry
July 10-12, 2017

This course covers the safety and health hazards associated with permit-required confined space entry. Course topics include recognition of confined space hazards, identification of permit and non-permit required confined spaces, use of instrumentation to evaluate atmospheric hazards, ventilation techniques, development and implementation of a confined space program, proper signage, and training requirements. This course features workshops on permit entry classification, instrumentation, and program development. Upon course completion students will have the ability to identify permit and non-permit required confined spaces, reference the OSHA Permit-Required Confined Spaces Standard, conduct atmospheric testing, and implement a permit-required confined space program.

Cost: \$650

OSHA 3115: Fall Protection
September 11-13, 2017

This course covers the OSHA Fall Protection Standard for construction and an overview of fall protection methods. Course topics include principles of fall protection, components and limitations of fall arrest systems, and OSHA Standards and policies regarding fall protection. Students will participate in workshops demonstrating the inspection and use of fall protection equipment, residential construction fall protection, training requirements, and developing a fall protection program. Upon course completion students will have the ability to assess compliance with the OSHA Fall Protection Standard, evaluate installed passive systems and fall arrest systems, and develop and implement fall protection plans.

Cost: \$650

ONSITE TRAINING

Need a course for your facility? If you have 12 or more people, onsite training courses can be arranged.
